EXECUTIVE SUMMARY

Senior architect and people leader with 15+ years in Architecture positions (Enterprise and Solutions Architecture), and 3+ years leading solution architects, specialising in enterprise AI adoption. Proven record of accomplishment partnering with Business, Product, and Engineering to drive technical excellence, and enable high-value AI solutions.

Deep ability in architecting and governing production grade LLM and agentic systems, including API-based integrations, reusable AI platforms, and secure enterprise deployments. Comfortable operating in ambiguous, fast-moving environments, building teams and processes from the ground up, and engaging executive, regulatory, and technical stakeholders to enable safe, reliable, and societally beneficial AI adoption.

PROFESSIONAL EXPERIENCE

WPP Media — London, UK

Senior Director, Agentic AI Systems Architecture

December 2025 – Present

- Lead the architecture and technical strategy for **enterprise scale agentic and LLM-powered systems** across WPP Media, setting up secure, reusable AI foundations used across products, markets, and teams.
- Partner closely with product to **scope high-value applied AI use cases**, support executive level decision-making, and confirm business impact and ROI.

- Define **scalable AI engagement frameworks**, balancing rapid innovation with governance, risk management, and regulatory compliance.
- Act as senior architect advisor, translating complex AI architectures into clear outcomes for technical and nontechnical audiences.
- Mentor and guide senior architects and engineers, supporting career development, technical standards, and cross functional collaboration in an evolving AI organisation.

BBC Studios, London, UK

Lead Enterprise Architect – Technology Transformation Group
November 2021 – November 2025

- Led the redesign of the enterprise architecture operating model, reshaping architecture practices, reorganising solution architects across business domains, and introducing **SAP LeanIX** as the single system of record.
- Managed and mentored a team of senior solution architects, building a sustainable technology foundation aligned to long-term business strategy.
- Established the **AI Capability Model** and created an **Enterprise Architecture Generative AI Framework**, guiding AI initiatives from experimentation through to secure production deployment.
- Partnered with the Innovation Hub and external technology partners to accelerate applied AI experimentation and knowledge sharing.
- Chaired architecture governance boards and served on cross technology forums, influencing investment decisions, risk management, and strategic roadmaps.
- Represented BBC Studios externally, contributing to industry conferences and thought leadership on architecture, AI, and technology transformation.

British American Tobacco (BAT), Global / Americas

Enterprise Architect – Scientific Research & Development
July 2019 – October 2021

- Established enterprise architecture governance and compliance frameworks within highly regulated R&D environments.
- Partnered with cross functional business and technology teams to build digital foundations supporting operational excellence and innovation.

Global Solution Architect – Integration & Automation
January 2017 – July 2019

- Designed integration and automation architectures using platforms such as **SAP Cloud Platform** and **UiPath**, supporting large-scale digital transformation programmes.
- Ensured architectural consistency and risk mitigation across global initiatives.

Regional	Solution	Architect
<i>July 2011 – December 2016</i>		

- Bridged regional business needs with global architecture strategies across culturally diverse markets, delivering scalable enterprise solutions.

EDUCATION

MSc	Computer	Science
Mogi das Cruzes University — 1988–1991		

CERTIFICATIONS

- TOGAF 9 Certified Architect
- SAFe Certified Architect
- LeanIX Certified Enterprise Architecture Practitioner

CORE SKILLS

Applied AI & Architecture

- LLM & Agentic Systems Architecture
- Enterprise AI Adoption & Governance
- API First AI Platforms
- Prompt Engineering & LLM Evaluation
- Secure & Compliant AI Deployment

Leadership & Collaboration

- Architecture & Technology Team Leadership
- Hiring, Mentoring, & Managing Senior Solutions/Enterprise Architects
-
- Cross Functional Influence (Business, Product, Engineering)

LANGUAGES

- English — Full Professional
- Portuguese — Native

PROFESSIONAL INTERESTS

- Advancing safe, reliable, and beneficial AI adoption in enterprises
- Responsible innovation in Generative and Agentic AI
- Building inclusive, collaborative technical cultures
